A Declaration of the Independence of Cyberspace

By John Perry Barlow
• Networked Information Economy
  • Increased importance of decentralized individual action thanks to affordable access to the means of information and cultural production, and in a new form: commons-based peer production

• Networked Public Sphere
• Government as a Platform
• Generativity, Robustness, ...
Gov 2.0 lessons from successful computing platforms

1. Open Standards Spark Innovation and Growth
2. Build a Simple System and Let It Evolve
3. Design for Participation
4. Learn from Your “Hackers”
5. Data Mining Allows You to Harness Implicit Participation
6. Lower the Barriers to Experimentation
7. Lead by Example
